

Flush Mounted Corner Guards

Models CG-500 (shown) and CG-510

Flush mount stainless steel corner guards provide the protection of stainless steel with a slick, finished look. Available in nearly any custom height, we recommend them for use in floor to ceiling applications in new walls. We offer standard wing sizes of 2" (50.8mm) and 3" (76.2)" with retainer and stainless steel cover or a formed stainless steel construction.

About Alpar Architectural Products

Alpar Architectural Products LLC provides impact protection for walls with the least possible environmental impact. All of our products are FREE from polyvinylchloride (PVC), petroleum and persistent bioaccumulative toxins (PBTs) and are made from recycled and rapidly renewable materials including deTerra® biobased polymer, aluminum and stainless steel.

DeTerra® biobased polymer looks and feels like traditional plastics but is made from more than 90% rapidly renewable materials and are grown and processed into compound in the USA. It is the only wall protection material that is approved by the EPA as biodegradable and that can be composted. It is Class 1/A fire rated and far outperforms PVC, PETG and ABS for flame spread and smoke density when tested to ASTM E84. It also outperforms these materials in many mechanical, chemical and stain resistance tests relevant to wall protection.
